Contents of Volume 45

Nos. 1, 2

W.J.M. Epping *(The Netherlands)*
Influence of adaptation on neural sensitivity to temporal characteristics of sound in the dorsal medullary nucleus and torus semicircularis of the grassfrog 1

R. Patuzzi and R. Rajan *(Australia)*
Does electrical stimulation of the crossed olivo-cochlear bundle produce movement of the organ of Corti? 15

A.N. Popper and B. Hoxter *(U.S.A.)*
Growth of a fish ear II. Locations of newly proliferated sensory hair cells in the saccular epithelium of *Astronotus ocellatus* 33

J.P. Mäkelä, G. Karmos, M. Molnár, V. Csépe and I. Winkler *(Hungary)*
Steady-state responses from the cat auditory cortex 41

J.J. Prieto, J. Rueda and J.A. Merchan *(Spain)*
Two different secretion mechanisms in the inner ear's interdental cells 51

J.A. Hasko, G.P. Richardson, I.J. Russell and G. Shaw *(U.K., U.S.A.)*
Transient expression of neurofilament protein during hair cell development in the mouse cochlea 63

A.R. Møller and H.D. Jho *(U.S.A.)*
Late components in the compound action potentials (CAP) recorded from the intracranial portion of the human eighth nerve 75

A.H. Gitter and H.-P. Zenner *(F.R.G.)*
The cell potential of isolated inner hair cells in vitro 87

D.O. Kim, J.G. Sirianni and S.O. Chang *(U.S.A.)*
Responses of DCN-PVCN neurons and auditory nerve fibers in unanesthetized decerebrate cats to AM and pure tones: Analysis with autocorrelation/power-spectrum 95

L.J. Hood, D.A. Martin and C.I. Berlin *(U.S.A.)*
Auditory evoked potentials differ at 50 milliseconds in right- and left-handed listeners 115

R.D. Hall *(U.S.A.)*
Estimation of surviving spiral ganglion cells in the deaf rat using the electrically evoked auditory brainstem response 123

R. Rajan *(Australia)*
The effect of upper pontine transections on normal cochlear responses and on the protective effects of contralateral acoustic stimulation in barbiturate-anaesthetized normal-hearing guinea pigs 137

K.C. Horner and Y. Cazals *(France)*
Alterations of CAP audiogram by increased endolymphatic pressure and its relation to hydrops 145

P. Gil-Loyzaga, A.M. Bueno, J.P. Broto and A.M. Pérez *(Spain)*
Effects of perinatal hypothyroidism in the carbohydrate composition of cochlear tectorial membrane 151

Short Communication
K. Doi, N. Mori and T. Matsunaga *(Japan)*
Effects of forskolin and 1,9-dideoxy-forskolin on cochlear potentials 157

Announcements 165

No. 3

L. Gray *(U.S.A.)*
Development of temporal integration in newborn chickens 169

B. Kachar, M. Parakkal and J. Fex *(U.S.A.)*
Structural basis for mechanical transduction in the frog vestibular sensory apparatus: I. The otolithic membrane 179

I.M. Winter, D. Robertson and G.K. Yates *(Australia)*
Diversity of characteristic frequency rate-intensity functions in guinea pig auditory nerve fibres 191

G.K. Yates, I.M. Winter and D. Robertson *(Australia)*
Basilar membrane nonlinearity determines auditory nerve rate-intensity functions and cochlear dynamic range 203

R.A. Schmiedt, J.H. Mills and J.C. Adams *(U.S.A.)*
Tuning and suppression in auditory nerve fibers of aged gerbils raised in quiet or noise 221

M.C. Zrull and J.R. Coleman *(U.S.A.)*
Fetal tectum grafted as a cell suspension into the adult rat inferior colliculus 237

J. Attias, H. Sohmer, S. Gold, I. Haran and A. Shahar *(Israel)*
Noise and hypoxia induced temporary threshold shifts in rats studied by ABR 247

H.C. Moore and M.D. McGinn *(U.S.A.)*
Effects of profound sensorineural loss on gerbilline auditory encephalopathy 253

B.N. Evans *(U.S.A.)*
Fatal Contractions: Ultrastructural and electromechanical changes in outer hair cells following transmembraneous electrical stimulation 265

J.J. Prieto, M.E. Rubio and J.A. Merchan *(Spain)*
Localization of anionic sulfate groups in the tectorial membrane 283

O. Gleich, B.M. Johnstone and D. Robertson *(Australia)*
Effects of L-Glutamate on auditory afferent activity in view of its proposed excitatory transmitter role in the mammalian cochlea 295
